EHR Incentive Payments Begin

Right on schedule, the first Medicare electronic health record (EHR) incentive payments were issued the week of May 16, the Centers for Medicare & Medicaid Services (CMS) announced. No mention was made as to how much money was paid or to whom.

Registration for the Medicare EHR Incentive Program opened in January; and since then 40,379 eligible professionals (EPs) have registered, according to CMS.

Ingenix says, however, "of the estimated 95,000 physicians now using an EHR system, a mere 150 stepped forward [April 18] to say they had achieved phase 1 meaningful use measures."

April 18 was opening day for EPs and eligible hospitals to attest to having met Medicare EHR Incentive Program requirements.
